Rising 4's Class

On the Banks of the Wide St. Johns

Dear Parents,

I hope that your child enjoyed our first week of SumFun. This is going to be another busy week!

This week we will be focusing on the animals that use and live in rivers. We will be visiting the Marine Science Research Institute (MSRI) on Wednesday and Thursday.

Wednesday we will be learning about sharks and hunting for sharks teeth with Dr. Bryan Franks.

Thursday we will be learning about manatees from Dr. Gerry Pinto and we will be meeting with Ms. Emily Floore with the St. John's Riverkeepers.

These opportunities are part of the great JU Advantage we have here at Wilma's!

Don't forget to bring library books and sharing Friday! The children did such a great job on their JU library visit selecting their books.

Sincerely,
Michale Dudley

Snack Menu
